

IE/RE Submits INR Application for Screening Study Only

Let's set your application type

What size is your project?

New ☒ 10 MW or larger - Large Generation
☐ 1 up to 9,999 MW - Small Generation

Is your project a settlement only generation project?

SOG ☐ Yes ☒ No

How will your project be connected?

Connection ☒ Transmission Connected
☐ Distribution Connected

Today I plan to do the following phases for my project

☐ SS - Screening Study Only
☐ SS and Full Interconnection Study
☐ Today I'm ready to make the Full Registration application
You have answers for all required fields

Your application type is: **TGR-LG**

Gen Type and Connection	Transmission Generator	TGR
Size	10 MW or larger	LG

[Start Over](#) [Let's Go!](#)

Figure 1 This is for Large Gen. This is the first different screen. Select an option under NEW, SOG, CONNECTION. Then pick the appropriate option under "Today I plan...". For a standard timeline, the IE will pick "SS – Screening Study Only". Click "Let's Go"

Let's set your application type

What size is your project?

New ☐ 10 MW or larger - Large Generation
☒ 1 up to 9,999 MW - Small Generation

Is your project a settlement only generation project?

SOG ☐ Yes ☒ No

How will your project be connected?

Connection ☐ Transmission Connected
☒ Distribution Connected

Your application type is: **DGR-SM**

Gen Type and Connection	Distribution Generator	DGR
Size	1 to 9,99 MW	SM

[Start Over](#) [Let's Go!](#)

Project Dates - what are the target dates for your project

Commercial Operation Date (Required)

03-07-2024

Commercial Operation Date

Commercial Operation Date is the date you

- expect that construction and trial operation of your Resource will be completed
- and when your Resource is expected to complete the Resource interconnection process
- and you are approved for participation in ERCOT market operations.

If an exact date is not known, enter the last day of the month in which the Commercial Operation Date is expected.

Please note:

All interconnection requests must complete the Request For Information (RFI) related to the Lone Star Infrastructure Protection Act (LISPA). Please download this RFI here: https://www.ecot.com/files/docs/2021/12/06/Lone_Star_Infrastructure_Protection_Act_RFI.docx

Please follow the instructions in the RFI, and also upload it to RiOO-IS as an attachment (File type "Other") during the initial INR application.

Generation Entity Information

Lone Star Attestation

Generation Entity Information Sheet

Transmission Customer (Generating Entity):

Beatles Inc

Contact Person:

James Teixeira

Company:

The Beatles

Phone Number:

5126566734

Extension:

Requested Transmission Energization Date:

03-07-2024

Beatles Inc is, or will be upon commencement of service, an eligible customer. An eligible customer is any of the following: the transmission provider (for all uses of its transmission system) and any electric utility, federal power marketing agency, exempt wholesale generator, qualifying facility, or power marketer. An eligible customer may designate an agent to represent it in arranging for interconnection.

Accurate/appropriate information and test data about generator step-up transformers, all generator data including data for stability studies (transient, voltage, etc.) and sub-synchronous resonance data will be provided to ERCOT and interconnected TSP before the generation goes into commercial operation. I understand that all of this data will become public and added to the ERCOT databases (including power flow base cases, stability, system protection, Capacity, Demand, and Reserve Report, etc) when an interconnection agreement is signed. This data shall be reviewed and updated when the plant goes into commercial operation. In addition, any updates to this information will be provided within 60 days to ERCOT and the TSP as changes or upgrades are made during the life of the plant. This requirement also applies to all future owners of this project/plant.

The generating entity and any future owners of the plant agree to comply with these data requirements along with all applicable ERCOT and NERC requirements, including, without limitation, those contained in the ERCOT Protocols and ERCOT Operating Guides. It is understood and agreed that such requirements are subject to change from time to time, and such changes shall automatically become applicable based upon the effective date of the approved change.

By typing your full name and date below you are digitally signing and agree to the information presented in this document

Generation Entity Information

Lone Star Attestation

ATTESTATION REGARDING COMPLIANCE WITH THE Lone Star Infrastructure Protection Act

Interconnecting or Resource Entity:

Beatles Inc

IE/RE's Interconnection Request (INR) number:

24INR1105

Check the option that applies:

1. With respect to the above referenced IE/RE and INR number and with respect to each Entity with an ownership interest in the real property to be utilized by the above referenced IE/RE's project ("Property Owner"), I hereby attest that:

☒ NONE OF THE FOLLOWING STATEMENTS IN PARAGRAPHS (A) - (C) ARE TRUE.

☐ ONE OR MORE OF THE FOLLOWING STATEMENTS IN PARAGRAPHS (A) - (C) ARE TRUE.

A) The IE/RE or Property Owner, or a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of the IE/RE or Property Owner, is owned by:

(i) individuals who are citizens of China, Iran, North Korea, Russia, or a designated country;¹ or

(ii) a company or other entity, including a governmental entity, that is owned or controlled by citizens of or is directly controlled by the government of China, Iran, North Korea, Russia, or a designated country; or

B) The majority of stock or other ownership interest of the IE/RE or Property Owner, or a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of the above referenced IE/RE or Property Owner is held or controlled by:

(i) individuals who are citizens of China, Iran, North Korea, Russia, or a designated country; or

(ii) a company or other entity, including a governmental entity, that is owned or controlled by citizens of or is directly controlled by the government of China, Iran, North Korea, Russia, or a designated country; or

C) The IE/RE or Property Owner, or a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of the IE/RE or Property Owner is headquartered in China, Iran, North Korea, Russia, or a designated country.

¹ The term "designated country" as used in this attestation shall have the same meaning as the definition of that term in Texas Business and Commerce Code, Section 113.001(4), added by Act of June 18, 2021, 87th Leg. R.S. Ch. 975 (S.B. 2116).

By inserting my name below, I certify that I am an officer, executive, or authorized employee with authority to bind the IA listed above, that I am authorized to execute and submit this attestation on behalf of each IE/RE listed above, and that the statements contained herein are true and correct.

Check Application Progress Save and Back

Figure 35 Once all the data has been entered and no red text error messages are displayed, click the "Save and Back" buttons at either the top or bottom right of the page.

The screenshot shows the ERCOT Interconnection Services interface. On the left is a sidebar with the ERCOT logo, user ID 24INR1105, and a navigation menu including Home, Interconnection Services, Substation, Unit, Resource, Lines, MLSE, Breaker Switch, Shunt Device, Main Power Trans, Series Device, Static Var Compensator, and Load. The main content area is titled 'Interconnection Services' and 'Substation Details'. It includes a 'Check Application Progress' button and a table with the following data:

Substation Name	Substation Code (Defined with ERCOT)	
B52 STRATO FORTRESS	B52	✎ Edit

Below the table, there is a link '+ Add Substation Information' with a '1 Required' badge, and a 'Done' button. A message states: 'If you have no other Substation information to add, select Done.'

Figure 36 The error shown above was not fixed so after clicking the “Save and Back” button, the IE/RE goes back to the pre-rec page and sees a red “Edit” button. This means there is an error that must be fixed or a required field was not entered. Click the red “Edit” button to go back to the Substation Details page and fix the error.

This screenshot shows the same ERCOT Interconnection Services interface as Figure 36, but the 'Edit' button is now green. The table data remains the same:

Substation Name	Substation Code (Defined with ERCOT)	
B52 STRATO FORTRESS	B52	✎ Edit

The rest of the interface, including the sidebar and the '+ Add Substation Information' link with '1 Required' badge, remains unchanged.

Figure 37 After changing the 40.5 to 30.5, the error was fixed, the “Save and Back” button was clicked, and now at the pre-rec page the “Edit” is green.

Figure 42 After entering the data for Substation “Load Split”, the required data for the Substation section has been entered and the section has a green “Edit” button. The next data that needs to be entered is the Unit data, starting with the “Unit Details” page. Then move to the next page and when complete, the next section. The Substation, Unit, and Resource sections are the minimum data sections that must be completed. Other sections are completed if the IE/RE has that type of equipment, such as breakers, shunt devices, lines, transformers, etc. The MLSE section should be complete if the IE/RE has data to enter in that section.

Declaration of Department of Defense

Declaration of Department of Defense Notification

Please Review Carefully - you must digitally sign and submit with your INR

Interconnecting Entity (IE):

Beatles Inc

This declaration applies to the following proposed Generation Resource and Interconnection Request

24INR1105

Check the below listed attestation(s) which apply to the Generation Resource.

I hereby attest that:

☐ This IE has notified the Department of Defense (DOD) Siting Clearinghouse of the above listed proposed Generation Resource and requested that it perform an Informal Review and/or Formal Review as described in 32 C.F.R. § 211.1 (2013).

☐ This IE has notified the Department of Defense (DOD) Siting Clearinghouse of the above listed proposed Generation Resource and requested that it perform an Informal Review and/or Formal Review as described in 32 C.F.R. § 211.1 (2013). This IE has completed the formal review process for the Generation Resource with the Department of Defense (DOD) Siting Clearinghouse and Federal Aviation Administration (FAA), as described in 14 C.F.R. § 77.7 (2010) and 32 C.F.R. § 211.6 (2013); or

☐ The above listed proposed Generation Resource is exempt from the requirement to seek review from the Department of Defense (DOD) and the Federal Aviation Administration (FAA), as described in 14 C.F.R. § 77.7 (2010) and 32 C.F.R. § 211.6 (2013).

By signing below, I certify that I am an officer, executive, or authorized employee with authority to bind the IE listed above, that I am authorized to execute and submit this declaration on behalf of each IE listed above, and that, to the best of my knowledge, the statements contained herein are true and correct.

Figure 53 Here the Full Registration data should appear in RIOO-RS on 12/9/2022. When it is in RIOO-RS, the “Change Substation Details Status” should have changed to “Modeled” or “Processed”.

The day after the Full Registration Data has been set to “Ready For Modeling”, the follow query can be run to run a separate set of validation rules in PL/SQL.

```
select * from RARFSTG.PRE_GRADUATE_VALIDATE_EXCEPTIONS_VIEW t where t.inr_id in ('24INR1105')
```

If any errors are detected when this query is run then the INR can be put into “Incomplete” in the “Change Substation Details Status” control. Then click “Save Substation Data” and the IE/RE should be able to correct the errors. They would then change the “Change Substation Details Status” back to “Ready for Modeling” after correcting the errors and click the “Save Substation Data” button again.

Resource Services

Hello, Jay T | My Account | Log Out | Help

Substation Detail Information

Let's set your application phases for your project:

How would you like to submit your application today!

Today I plan to do the following for my project

☒ SS and Full Interconnection Study

FIS Studies - check at least Short Circuit, Steady State, Planning

☒ Short Circuit

☒ Steady State

☒ Facility

☒ Stability and Dynamics

☐ SSR

☐ Planning

☐ Today I'm ready to make the Full Registration application

You have answers for all required fields

You can change your answer throughout the application, and we will show you convenient ways to get back to this selection along the way.

[Continue](#)

Figure 63 This is new. Now the IE/RE must select which FIS studies they will be submitting data. Click either "Short Circuit", "Steady State", or "Stability and Dynamics" or any combination to begin the FIS process. Once data for the three studies have been selected, select the "Facility" study as well. Click "Continue"

Generation Entity Information

Declaration of Department of Defense

Lone Star Attestation

Generation Entity Information Sheet

Transmission Customer (Generating Entity):
Contact Person:
Company:
Phone Number:
Extension:
Requested Transmission Energization Date:

Beatles Inc
James TeixeiraE
The Beatles
5126566734

06-08-2023

Beatles Inc is, or will be upon commencement of service, an eligible customer. An eligible customer is any of the following: the transmission provider (for all uses of its transmission system) and any electric utility, federal power marketing agency, exempt wholesale generator, qualifying facility, or power marketer. An eligible customer may designate an agent to represent it in arranging for interconnection.

Accurate/appropriate information and test data about generator step-up transformers, all generator data including data for stability studies (transient, voltage, etc.) and sub-synchronous resonance data will be provided to ERCOT and interconnected TSP before the generation goes into commercial operation. I understand that all of this data will become public and added to the ERCOT databases (including power flow base cases, stability, system protection, Capacity, Demand, and Reserve Report, etc) when an interconnection agreement is signed. This data shall be reviewed and updated when the plant goes into commercial operation. In addition, any updates to this information will be provided within 60 days to ERCOT and the TSP as changes or upgrades are made during the life of the plant. This requirement also applies to all future owners of this project/plant.

The generating entity and any future owners of the plant agree to comply with these data requirements along with all applicable ERCOT and NERC requirements, including, without limitation, those contained in the ERCOT Protocols and ERCOT Operating Guides. It is understood and agreed that such requirements are subject to change from time to time, and such changes shall automatically become applicable based upon the effective date of the approved change.

By typing your full name and date below you are digitally signing and agree to the information presented in this document

Generation Entity Information

Declaration of Department of Defense

Lone Star Attestation

Declaration of Department of Defense Notification

Please Review Carefully - you must digitally sign and submit with your INR

Interconnecting Entity (IE):
This declaration applies to the following proposed Generation Resource and Interconnection Request

Beatles Inc
23INR0533

Check the below listed attestation(s) which apply to the Generation Resource.

I hereby attest that:

☐ This IE has notified the Department of Defense (DOD) Siting Clearinghouse of the above listed proposed Generation Resource and requested that it perform an Informal Review and/or Formal Review as described in 32 C.F.R. § 211.1 (2013).

☐ This IE has notified the Department of Defense (DOD) Siting Clearinghouse of the above listed proposed Generation Resource and requested that it perform an Informal Review and/or Formal Review as described in 32 C.F.R. § 211.1 (2013).
This IE has completed the formal review process for the Generation Resource with the Department of Defense (DOD) Siting Clearinghouse and Federal Aviation Administration (FAA), as described in 14 C.F.R. § 77.7 (2010) and 32 C.F.R. § 211.6 (2013); or

☐ The above listed proposed Generation Resource is exempt from the requirement to seek review from the Department of Defense (DOD) and the Federal Aviation Administration (FAA), as described in 14 C.F.R. § 77.7 (2010) and 32 C.F.R. § 211.6 (2013).

By signing below, I certify that I am an officer, executive, or authorized employee with authority to bind the IE listed above, that I am authorized to execute and submit this declaration on behalf of each IE listed above, and that, to the best of my knowledge, the statements contained herein are true and correct.
